

GW-500

Straight Truss Gangway

- Rugged equal height truss construction affords a distributed load capacity of 2000 lbs.
- Available in lengths to 70'. Constructed of 6000 series marine grade aluminium alloy for durability.
- 24" wide aluminium deck plate features a slip-resistant coating and aluminium angle cleats for better traction and added safety.
- Available with 5 1/2" rollers on dock side, allowing for variations in ship's float.
- Curved tread models available.

GW-100

Bowed Truss Gangway

- Bowed truss construction affords a distributed load capacity of 2000 lbs.
- Available in lengths from 20' to 40'. Constructed of 6000 series marine grade aluminium alloy for durability.
- 24" wide aluminium deck plate features a slip-resistant coating and aluminium angle cleats for better traction and added safety.

SGW

Stage Gangway

- Distributed load capacity of 750 lbs.
- Available in lengths from 12' to 40'.
- Economical, lightweight, and portable.
- Available in 24" or 28" wide perforated deck walking surface with angle cleats for better traction and added safety.

If required, we can supply most applications with curved Marine Tread
