

Loadtec Marine Loading Arms bring together the latest thinking in Marine Arm design, with efficient and cost effective European production. Loadtec compete with low costs that can be realised as massive savings to the customer.

Loadtec utilises the pantograph link design to provide high quality and robust arms ranging from 4" to 20". Apart from the standard temperature range, Loadtec can supply arms that operate at 196°C or + 200°C.

A unique feature to the Loadtec Marine Loading Arm is the ability to change the 1st and 2nd swivel in-situ, without dismantling the arm. This is an important feature which saves many hours and cost over the lifetime of the arm.

Loadtec also has its own Double Ball Valve Emergency Release system which is installed in the vertical leg.

Loadtec Hydraulic Control Systems are manufactured in Western Europe under our control and incorporate mainstream and recognised components.

WITH DBV-ERC & HYDRAULIC QCDC

WITH DBV-ERC & MANUAL QCDC

WITH HYDRAULIC QCDC ONLY

The Loadtec ERS and QCDC are built at our dedicated manufacturing facility and incorporate a number of features to ensure reliable and safe disconnection from the ship in the event of an emergency.

The Loadtec hydraulic QCDC has elastic push-rods with closure in the over-centre position (with a sensor if required) and it is not affected by fatigue or extended usage.

The centering guides perfectly align the coupler during connection to the manifold flange.

All clamps are equi-spaced and operate simultaneously.

Complete and safe control of the Marine Arm(s) is absolutely vital. The Loadtec control system is designed to provide the recognised fail safe features along with outstanding levels of clarity and ergonomics for the operator. Monitoring systems provide easy to read and interact with, for the most challenging environments.

Loadtec provides a positive and easy-to-do-business-with environment. If your facilities are being upgraded or renewed and you want a modern, future-proof design from a responsive and reliable supplier, then please give Loadtec a call. See how we can help you to provide a cost effective, quality solution.
